Notes. Scores range from -1 to +1 and are equal-novel means. At occurrence level, a dimension was coded 0 when the context supported neither a clear positive nor a clear negative judgement, or when the available evidence was insufficient; occurrences with all five dimensions coded 0 were excluded. Occurrences reports included agency-scored occurrences / valid lexical-predicate occurrences. The author manually reviewed the automatically generated scores for a stratified sample of 180 occurrences before the procedure was applied to the complete dataset.
